EXECUTIVE SUMMARY

Wyvern performed an initial safety evaluation of Aero Paraiso S.A., certificate number COA-TX-001 at its Pavas, Costa Rica Headquarters at Tobias Bolanos International Airport (MRPV) on August 13-14, 2009. The audit team, comprised of two aviation professionals, conducted an inspection of the organization for compliance with governing regulations and The Wyvern Standard. The scope of the evaluation included a review of the company operational history and safety record, operational control, Safety Management System, administrative composition, security, company manuals, pilot and aircraft records, and training requirements.

During this evaluation, Aero Paraiso S.A. was observed to meet the applicable federal regulations, the requirements of its internal policies and procedures, and The Wyvern Standard in most areas. However, compliance with the Data Management requirements promulgated by Wyvern Standard 1.E.6 also necessitated verification, and Aero Paraiso S.A. sufficiently met those requirements. Likewise, the discrepancies listed in Appendix A were identified during the audit, and required evidence of remedial action before Wyvern could recommend the services of Aero Paraiso S.A.

In written communications dated October 14, 2009, Aero Paraiso S.A. provided evidence that each of the discrepancies had been resolved. [REDACTED]
